

Special fabric

Triflex ProMesh

Product information

Applications

Triflex ProMesh is used for reinforcement in the Triflex ProDeck system.

Properties

Triflex ProMesh is a special fabric with material-reinforcing and crack-bridging properties. The mass per unit area is 350 g/m².

- Patent pending

Pack size

Roll

100 cm x 100 m w x l Triflex ProMesh

Colours

White

Storage

Store Triflex ProMesh vertically in a dry place and protect against moisture.

Instructions for use

It is used in the Triflex ProDeck system. Triflex ProMesh is embedded and saturated in the resin and pressed down to remove all creases and voids. The fabric is fully saturated wet-on-wet; see also the Triflex ProDeck system description. Fabric panel ends must be butted together.

General notes

We guarantee the consistently high quality of our products. Non-Triflex products must not be used with Triflex systems.

The advice we give in relation to the application of our products is based on extensive development and many years of experience, and is correct to the best of our knowledge. Given the multitude of on-site requirements, under the most varied of conditions, the user is required to test the product's suitability for its respective purpose. Technical information is subject to change without notice in the interests of technical advancement or enhancement of our products.
