

Triflex

Ensemble, une solution.

Un univers de couleurs Gamma di colori

Triflex Chips Design

52 teintes. Une myriade de possibilités. 52 colori. Infinite possibilità.

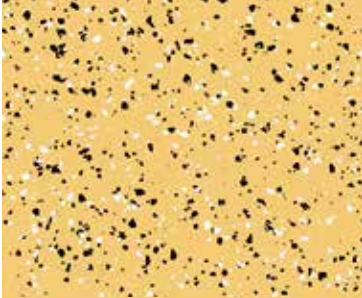

Les couleurs permettent de mettre en valeur vos balcons, loggias et coursives. Elles leur confèrent un caractère individuel et soulignent l'architecture du bâtiment. La gamme des couleurs du programme Triflex Chips Design vous propose 52 teintes et trois finitions différentes. Les solutions d'étanchéité Triflex protègent à long terme l'état de votre gros œuvre contre l'infiltration d'eau et d'humidité. Qu'il s'agisse de travaux de réfection ou de neuf, nous avons toujours la solution qui vous comblera pour longtemps.

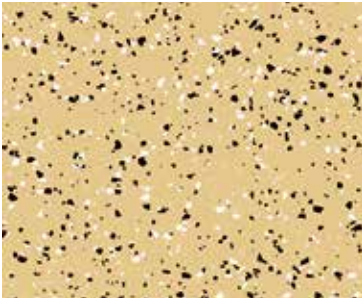

Il colore mette in risalto balconi, logge e portici. Dona un fascino particolare all'edificio, sottolineandone l'architettura. La gamma cromatica di Triflex Chips Design offre 52 diverse tonalità e 3 superfici. Le soluzioni d'impermeabilizzazione Triflex proteggono a lungo termine il materiale di costruzione contro infiltrazioni e umidità. Che si tratti di nuovi edifici o risanamenti, abbiamo la soluzione giusta che vi soddisferà a lungo.

Le matériau hautement élastique de nos systèmes à base de résine synthétique liquide supporte sans problème la sollicitation mécanique ponctuelle infligée par les chaises ou les pieds de table.

Il materiale altamente elastico dei nostri sistemi in resine liquide resiste senza problemi alle sollecitazioni meccaniche puntuali dovute a sedie o tavoli.

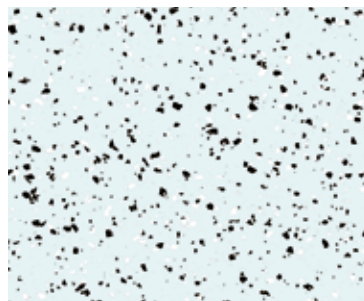

Finitions Finiture di superficie

Sablage avec Micro Chips

Les micropaillettes Triflex Micro Chips permettent de structurer les surfaces et d'alléger l'ensemble.

Spargimento di Micro Chips

Con Triflex Micro Chips, le superfici acquistano corpo. L'effetto ottico risulta alleggerito.

Malachite 01 | 7096

Finition sablée, fine

L'addition de sable de quartz séché au feu rend la surface antidérapante.

Spargimento, sabbia fine

L'aggiunta di uno strato di sabbia quarzosa essiccata a fuoco svolge un'azione antiscivolo.

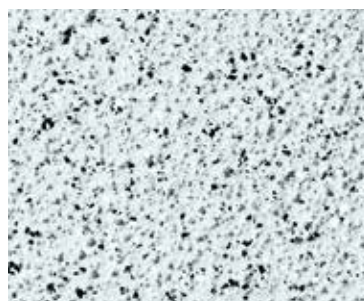

Malachite 01 | 7096

Finition sablée, grossière

Un sable de quartz grossier est indiqué notamment pour les escaliers et les plans obliques.

Spargimento, sabbia grossa

Lo spargimento di una sabbia quarzosa a granulometria grossa è raccomandato soprattutto su scale e superfici inclinate.

Malachite 01 | 7096

De nombreux avantages en un coup d'œil

- Réfection rapide, possible en une seule journée
- Réfection généralement sans démolition, saletés ni poussières
- Solutions résistant aux intempéries et aux UV
- Protection durable de l'état du gros œuvre contre l'humidité
- Surface entièrement étanche
- Matériau hautement élastique empêchant les fissures
- Mise en œuvre possible toute l'année (même à basses températures)
- Large choix de différentes couleurs et finitions
- Qualité certifiée et contrôlée

Tutti i vantaggi a colpo d'occhio

- Risanamento rapido in un solo giorno
- Risanamento convenzionale senza demolizione, sporco e polvere
- Soluzioni resistenti alle intemperie e ai raggi UV
- Protezione duratura del materiale di costruzione contro l'umidità
- Impermeabilizzazione completa
- Materiale altamente elastico evita fessure
- Lavorabilità durante tutto l'anno (anche a basse temperature)
- Svariati colori e superfici
- Qualità certificata e collaudata
