Triflex Marking Template

Product information

Applications

Triflex Marking Templates are used as marking aids for road markings, markings on parking spaces, in multi-storey and underground car parks, as well as on company and private premises. They make it easier to apply Triflex marking products.

Properties

The reusable Triflex Marking Templates offer the following features:

- 3 mm thick, high-quality aluminium
- With smooth, laser-cut edges
- Suitable for Triflex thick-layer and thin-layer markings
- Resistant to corrosion
- True-to-scale motifs as per the “Guidelines for marking roads” (RMS)
- Quick and easy handling with practical handles (optional)
- Individual motifs can be designed upon request

Pack size

Prefabricated single- or multi-part aluminium panels packed in corrugated cardboard. Larger and multi-part templates are supplied on disposable pallets.

See below for individual motifs.

Storage

Triflex Marking Templates must be stored in a dry place and protected from damage.

Processing instructions

To facilitate cleaning, the Triflex Marking Template must be pre-treated with Triflex Release Agent before use. Following application, the coarse material deposits must be removed with a paste and then with Triflex Cleaner MW.

General notes

We guarantee the consistently high quality of our products. Non-Triflex products must not be used with Triflex systems.

The advice we give in relation to the application of our products is based on extensive development and many years of experience, and is correct to the best of our knowledge. Given the multitude of on-site requirements, under the most varied of conditions, the user is required to test the product’s suitability for its respective purpose.

Technical information is subject to change without notice in the interests of technical advancement or enhancement of our products.
